	COLORADO TOTALS	64,140	50,700	79.0%	51,798

Notes:

**Beginning with data for the 2009-2010 school year, the Colorado Department of Education changed its calculation method of graduation rates to comply with federal law. The new methodology only includes "on-time" graduates, or students who complete four years. The change in methodology makes graduation rates for the 2009-2010 school year and beyond not comparable with previous years.*

***The completer rate is a cumulative rate which calculates the number of students who complete an educational program as a percentage of those who were in membership. These completers include students who graduate, receive certificates or other designations of completion or attendance, or receive a G.E.D. from programs administered by the district.*
